

Computing Corner

Personal Computers

This article is the third in an occasional series of stories addressing the changing role of the Applied Mathematics Department (AMD) at BNL.

A stereotype in journalism is the reporter standing in the midst of a smoke-filled room, moments from deadline, ripping a sheet of strike-over-riddled copy from a typewriter. Today, reporters, like much of the population, have largely given up smoking. And, with the advent of personal computers, they've also given up most paper copy, typewriters and strikeovers. In fact, about the only part left to the stereotype is the deadline.

Newsrooms represent only a fraction of the workplaces that have changed because of personal computers (PC). In the laboratories and offices of BNL, for example, many scientists and secretaries, technicians and managers, programmers and designers use PCs as the means to their respective ends.

At present, Kurt Fuchel, manager of computer technical information and user support in AMD, says there are close to 300 IBM PCs on site. The influx of PCs began in earnest about two years ago. As various types of PCs came on the market, AMD was besieged with requests for information about many different models. With limited manpower resources, however, AMD could not support a variety of computers. The IBM PC proved the most popular one, and so, for the time being at least, AMD limits its support to IBM PCs and a limited set of peripherals, such as printers, not necessarily made by IBM.

Fuchel believes the PC's popularity is related to its cost, capability and ease of use. "The price of a PC is not much more than a 'dumb' terminal cost a few years ago, and you can do so much more with very little difficulty," he says. Though Fuchel's group will do what they can to assist Lab users who have other types of PCs, they are expert with the IBMs. AMD runs a "computer store," maintaining stocks of IBM PCs, as well as associated hardware and software.

Anyone interested in obtaining an IBM PC should contact Don Litcher, who is responsible for PC hardware support. Litcher and Technician Ed Taylor customize each computer to meet the needs of the requestor, then

check it out, deliver it and install it. If a component needs service during the warranty period, they handle it, leaving a "loaner," if need be, while repairs are made. Long-term maintenance is done by an AMD group headed by Mike Losquadro and Ed Brosnan.

Of course, any PC is only as good as its software. That's why Fuchel's group also stocks programs and related documentation to support IBM PCs. Shelves overflowing with new copies of manuals and disks for over 120 programs, the "software store," run by Technician George Taylor, now occupies a small room in AMD. Soon, however, it will move to a new area being readied near the Central Scientific Computing Facility (CSCF). The center will feature the software library, a demonstration section where people can look over new equipment and try out PCs and programs, and a reading room where users can peruse literature from various software companies.

With all the available software, Fuchel believes, "It's a mistake to think of the PC primarily as a machine you sit down and program. For just a few hundred dollars, you can buy a professionally written, maintained, documented, distributed program with built-in tutorial and help functions, which does a lot more than you would be able to do — unless you have a *small* scientific application or a very specific need to analyze data in a certain way. And some people do, because they use this as a data collection device and hook it up to an experiment. But I do not think that is the main use of this machine."

Fuchel sees the main use of the PC as a personal workstation, for such things as:

- **spread sheets** — Basically intended to be used in financial analysis to automatically recompute totals when entries are changed, these programs are also proving useful in other areas. In the Department of Applied Science (DAS), for example, scientist Paul Michael is running models for acid rain research on CSCF computers, then, via intraLab communications, bringing those results into a spread sheet program on his PC, where he does interactive analysis of the results. In another application, DAS Administrator Dick Melucci frequently needs spread sheets for work on electric power distribution and budgets, while

Grahn to Head Financial Management

Henry C. Grahn, who has been Assistant Director for Financial Planning since 1976, is moving into a new title and a new office. On October 1, he will become Assistant Director for Financial Management and will move to another office in the Director's Office.

Reporting to Grahn will be the Budget Office, the Fiscal Division and the Management Information Systems Division. The biggest change for Grahn is that, for the first time since 1969, he will not have direct responsibility for the preparation and submission of the Lab budget. A new budget officer will be appointed and a search is currently under way to fill the position.

As Lab Director Nicholas Samios said when announcing the appointment: "This reorganization affords a logical consolidation of fiscal operations and allows for a more effective integration of our resources."

Grahn feels that by the nature of their work, Budget and Fiscal should interact closely and that increased communication and cross training will strengthen this understanding. The Management Information Systems Division has embarked on an ambitious program to upgrade the Lab's administrative information

Henry Grahn

capabilities. Says Grahn, "Much of the current and future work (a new payroll system and a new personnel forecasting and budgetary system) heavily involves the Budget Office and the Fiscal Division. With everybody under the same roof, this should facilitate the implementation of the new systems."

Amid some of the hardware components that will soon find their way into offices and laboratories all around the Lab, Ed Taylor prepares an IBM PC for distribution.

communicating with the Hewlett-Packard computers in the Management Information Systems Division. With a terminal emulator program, Melucci's PC behaves like a Hewlett-Packard terminal. With another program, it can do two kinds of processing simultaneously.

- **graphics** — Using a program called Autocad, Lab designers do computer-aided drafting on PCs. Many other programs, such as spread sheets, have built-in graphics capabilities.

- **data base systems** — Managing data is an essential enterprise at BNL. These systems greatly facilitate the collection and interpretation of data, be it experimental or administrative. Working at the NSLS, Librarian Judy Liu, Technical Information Division, has set up a data base to handle all the technical reports the branch library receives from BNL and around the world. The system is also applicable to other branch libraries and small collections at the Lab.

- **office organization** — When certain programs are entered into a PC, the user can check a calendar, update a schedule, look up a phone number and have the machine dial it, or use a desk calculator, at any time, without affecting the main program in use.

- **word processing** — With word processing, Fuchel says, "I, who know how to type with only two fingers, can write my own memos, edit them and print them." But secretaries, long accustomed to dedicated word processors, are also turning to PCs. They enable Paul Michael and secretary Lola Kopp to work in concert: He drafts a report on his PC, then she takes his disk to her machine for formatting and printing. Also at DAS, new secretarial workstations are being evaluated, where, for example, a PC might be linked to a laser printer, for quiet, letter quality output. At High Energy Facilities, Audrey Blake works with budgets on a PC and would like to use it for more of her work. Now she's investigating scientific word processing programs that can do the math symbols her typing so frequently requires.

- **communications** — With boxes called modems and access to the right networks, a PC user is within easy reach of almost any other computer in the world. From his PC, for example, Fuchel can send documents, via AMD's Gandalf communications device, to the much more powerful VAX computer at the CSCF. There,

(Continued on page 2)

Kurt Fuchel (seated) and George Taylor test a new graphics package. In the foreground are some of the more popular programs in stock in the "software store" and a few related publications.

Six Avenues of Communication

Blue and white posters listing the six parts of the Employee Relations Program were put up around the Lab last Friday to remind employees that "at Brookhaven, there are many avenues open to you" to resolve any work-related problems. The poster is one-half of the Employee Relations Program's recent effort to let employees know how their work-related problems and complaints can be resolved promptly and fairly.

The other half of this effort is a booklet, which will be distributed next week, to be inserted in the orange Employee Guide binder. The booklet describes what the poster advertises: the Affirmative Action Program, Employee Assistance Program Coordinator, Employee Relations Committee, Employee Relations Counselor, Women's Program Coordinator and the Tune In Program.

"If a situation cannot be solved within a department or division, other options are available," says Edward McFadden, chairman of the Employee Relations Committee, which conceived the idea for the poster. "The poster outlines what these options are and the booklet will describe them."

If a problem is not resolved within the department or division, or if employees prefer not to consult their supervisors, the following avenues, in alphabetical order, are open, with the exception that employees covered by a collective bargaining agreement do not have access to the Employee Rela-

tions Committee or the Employee Relations Counselor.

Affirmative Action Program

As Affirmative Action Assistant to the Director, Earl Blanton has the responsibility to inform all employees of the Lab's affirmative action program and to monitor the Lab's equal employment opportunity effort. Blanton can be reached at Ext. 3318, Directors Office, Bldg. 460.

Each department has an Affirmative Action Representative who serves as liaison to the Office of Affirmative Action and to whom problems and questions may also be brought.

Employee Assistance Program Coordinator

Clinical Psychologist Judith Katsin can assist with mental health problems affecting job performance and can provide information on mental health issues. She has counseled employees for such difficulties as alcohol and drug abuse, family, marital and personal problems. All employee communication with Katsin are confidential. Katsin can be contacted at Ext. 4567, in the Medical Building, Room 5-5.

Employee Relations Committee

The seven-member Employee Relations Committee is appointed by and reports to the Director of the Laboratory. Lab-wide policy changes may come about as a result of the Committee's problem solving. The committee reviews problems brought by non-bargaining unit employees themselves or referred by the Employee Relations Counselor.

Any member can be contacted, and the members of the current committee include: Chairman Edward McFadden, Ext. 4005; James Costanzo, Ext.

(From left, rear) Assistant Director Jerome Hudis, James Costanzo, Edward McFadden, Personnel & Labor Relations Manager Robert D'Angio and Patricia Fox. (From left, front) Gail Williams, April Donegain, Susan Foster and Judith Katsin holding the new Employee Relations Program poster, Betty Heldman, Madeline Windsor and Vincent Racaniello. Absent from the picture is Earl Blanton.

Peter Horton

4040; April Donegain, Ext. 2903; Patricia Fox, Ext. 2939; Betty Heldman, Ext. 3699; Vincent Racaniello, Ext. 7336; and Madeline Windsor, Ext. 5069.

Employee Relations Counselor

Susan Foster, the Employee Relations Counselor, is available to non-bargaining unit employees to discuss work-related complaints, including personnel problems and problems with Laboratory policies and practices. Foster is located in the Personnel Office, Building 185, Ext. 2888. If she cannot resolve the problem, Foster may, with the consent of the employee, refer the question to the chairperson of the Employee Relations Committee.

Women's Program Coordinator

Gail Williams has been appointed Women's Program Coordinator by the

Director to address the particular concerns of women as part of the Affirmative Action Program. She may be found in the Office of Scientific Personnel, Bldg. 460, Ext. 3338.

Tune In!

Tune In! is a means of anonymously questioning Laboratory policies and practices. Orange, pre-addressed Tune In forms can be found in wall boxes at bulletin boards and mail drops. After completing the form, the employee can deliver the Tune In! to the Editor of the Brookhaven Bulletin, Public Relations Office, Bldg. 134, or mail it. The editor keeps the letters confidential and acts as a go-between to obtain an answer from the appropriate source within the Lab; she may assist in preparing replies, but is not the source of the reply.

Computers

(Continued)

his data can be computed further and/or faster. Or it might be processed through a program called TEX. When run on the laser printer hooked to the VAX, this typesetting program produces printer quality documents.

And speaking of typesetting, anyone with a PC can have documents typeset by the Composition Group in Photography & Graphic Arts. That's what happened with this Bulletin story, which was written on a PC in our "newsroom," using word processing. No typewriter was involved and any hard copies were strikeover-free. When completed, the story was telecommunicated to Composition for typesetting — in plenty of time to meet this week's deadline.

— Anita Cohen

PC Postscripts

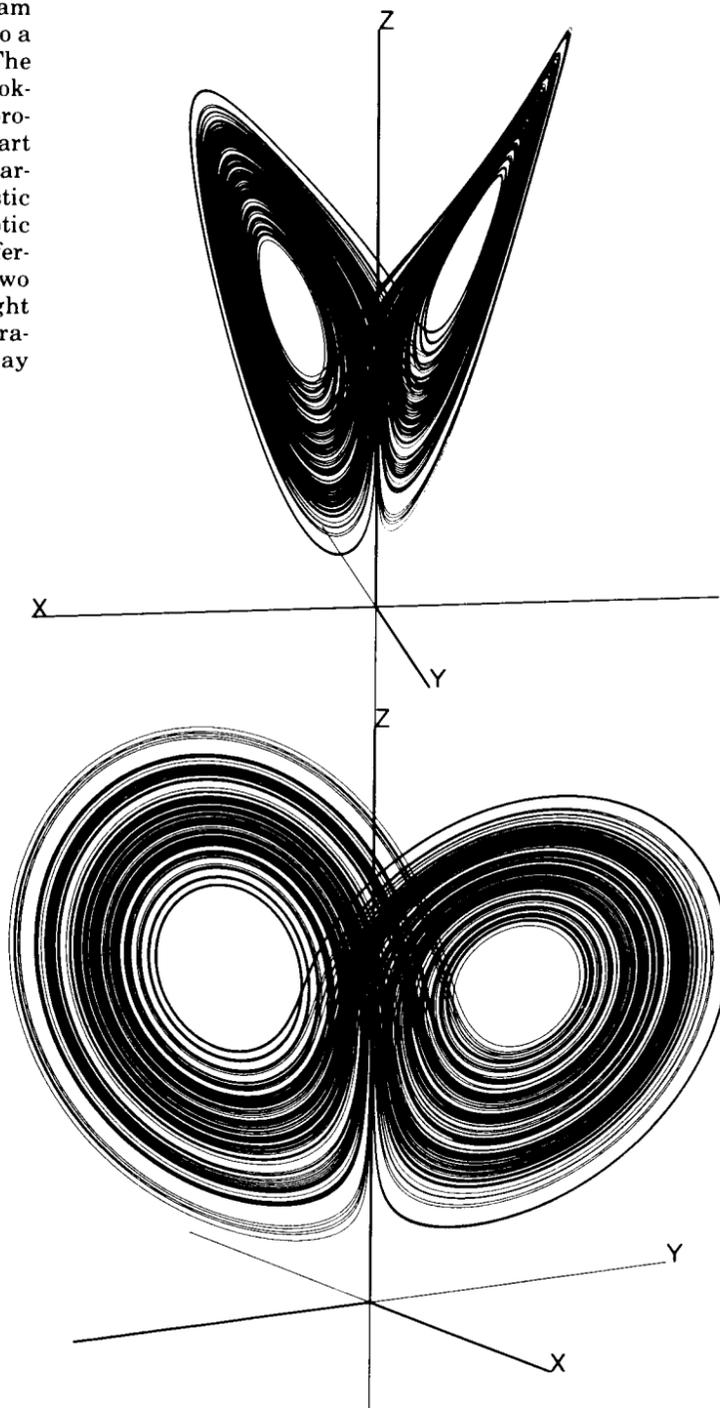

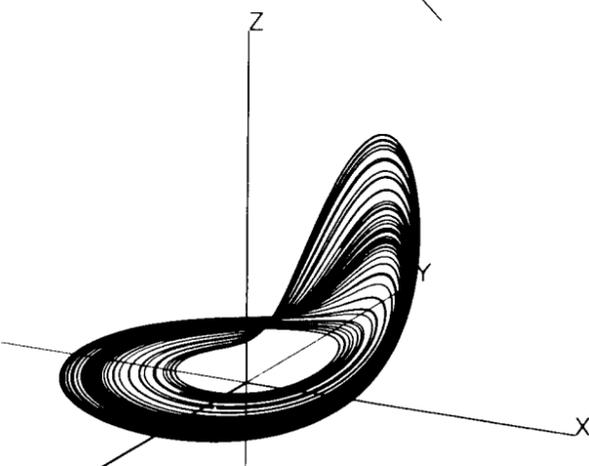

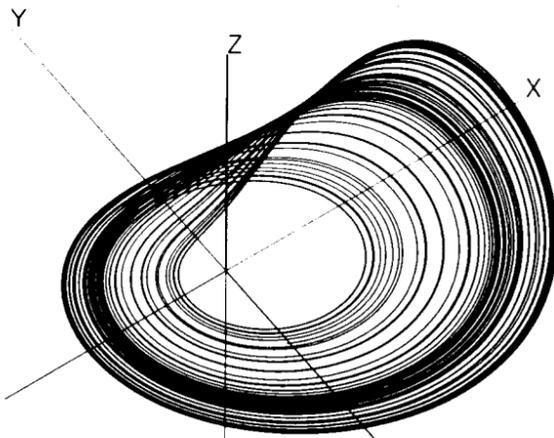

It's illegal to copy software. Even if it's not copy-protected, it's still copyrighted.

The expression "boot up," which computer users use to indicate that they are loading a program into a computer, comes from the expression "pull up by the bootstraps." Kurt Fuchel suggests that the expression arose because starting a computer activates a very small program, which then loads a larger one.

Disks should be protected from any particulate matter. In addition to dust, smoke can affect disk drives and disks. AMD's Don Litcher advises that disks should always be covered and kept away from "heat, electromagnetic sources and peanut butter and jelly."

If you have any questions about IBM PCs, you should go to AMD. For hardware help, contact Don Litcher, Ext. 7587; for software assistance, call Kurt Fuchel, Ext. 4116.

To the uninitiated these drawings may appear to be clam shells, a party mask and a figure-eight racetrack. But to a mathematician, they are representations of "chaos." The illustrations appear in Bruce Stewart's published Brookhaven Lecture, "The Geometry of Chaos," and were produced on the COMp80 micrographics system. Stewart explains, "Chaotic dynamics might be defined as apparently random recurrent behavior in a simple deterministic (clockwork-like) system." These pictures are of chaotic attractors. Below, a three-dimensional trajectory of differential equations on a Rössler band attractor seen from two different vantage points. The Lorenz attractor on the right was the first chaotic attractor observed by computer graphics, in 1963. Copies of Stewart's lecture, BNL 51892, may be requested from JoAnn Langan, Ext. 4142.

Sales Office Hours Changed

As of Monday, September 9, the BERA Sales Office in Berkner Hall will be open from 9 a.m. — 2 p.m.

Pool/Gym Schedules

Swimming Pool

Open: Saturday and Sunday, August 31 and September 1

Closed: Monday, September 2, Lab holiday

Normal Schedule — Beginning Tuesday, September 3.

Weekdays, Monday through Friday

11 a.m. — 1:30 p.m. (employees only)

5 p.m. — 9:30 p.m. (employees/families/guests)

Weekends, Saturday and Sunday

1 p.m. — 6 p.m. (employees/families/guests)

Present season tickets are valid through Monday, September 30. A new four-month season will begin on Tuesday, October 1.

Daily Admissions:
employee/family member \$1.25 each
guest 1.75 each

Gymnasium

Closed: Saturday, Sunday, and Monday, August 31, September 1, and September 2.

Maintenance Closing: Tuesday, September 3 through Friday, September 6

Open: Saturday, September 7

10 a.m. — 6 p.m. employees/family members/guests

Open: Sunday, September 8

1 p.m. — 6 p.m. Indoor tennis (sign-up system)

Beginning Monday, September 8, Monday through Friday

11 a.m. — 2 p.m. (employees only)

5 p.m. — 9 p.m. (employees/families/guests)

Saturday:
10 a.m. — 6 p.m. (employees/families/guests)

Sunday
1 p.m. — 6 p.m. Indoor tennis (sign-up system)

Guest Ruling (Applies to all recreation facilities)

One Guest - An employee is allowed to bring one guest per visit without special permission or prior arrangement. The guest must be accompanied by the employee.

Two to Five Guests - Advance arrangements for two to five guests may be made at the Recreation Office. (No more than five guests per employee is ever permitted.) When such an arrangement is made, the Recreation Office issues an admission card stating the sponsor's name and life number, the number of guests permitted, the date of visit, and the facility to be visited. Guests must be accompanied by the employee, who will be requested to show the admission card at the main gate and at the swimming pool ticket desk.

Aviation Club

The Aviation Club invites members and non-members to join the club for their next fly-in planned for Tuesday, September 17 to Block Island. Call Bob Larson on Ext. 4656 if you would like to participate.

1985-86 BERA Concert Series

The first concert of the new season is less than two weeks away, so mark your calendar for this and the other concerts scheduled at Berkner Hall.

September 12
Agustin Anievas, pianist

October 16
Ensemble for Early Music

November 22
The Concord String Quartet

March 11
The New Zurich String Quartet.

April 15
Musica da Camera Praga.

All concerts begin at 8:30 p.m. and are open to the public.

Admission is \$9 for adults, \$6 for students and those over 65, and \$5 for those under 18. Block tickets, good at any concert, are available at \$6 each for five or more tickets. Deadline for their purchase is the night of the first concert. Single tickets for each concert will be sold at the door, and all tickets may be purchased in advance from the following:

Arnold Aronson 475B 2606

Clemens Auerbach 197D 2914

Howard Gordon 510A 3740

Geoffrey Hind 463 3400

Richard Holroyd 555A 4329

Blanche Laskee 185 2873

Donald Lazarus 911B 4643

Myron Ledbetter 463 3418

Benjamin Magurno 197D 5207

Edwin Popenoe 490 3622

Stephen Schwartz 426 3100

T. Laurence Trueman 510A 3767

Met Opera Tickets

Tickets for the 1985-86 Metropolitan Opera Season will go on sale at the BERA Sales Office in Berkner Hall at 8:00 a.m. on Wednesday, September 11. On-site employees may purchase as many pairs of tickets as they wish. All sales will be final; no refunds or exchanges.

Copies of the schedule, including a listing of available Family Circle seats, may be picked up at the Sales Office between the hours of 9:00 a.m. and 2:00 p.m. For more information call Ext. 3347.

Golf

The sixth tournament of the BGA golf season will be held on Monday, September 16 at the West Sayville Suffolk County Golf Course. The tournament will be run as a two-player, pick your own partner, team scramble, with teams playing in flights based on the combined team handicap.

Tee times will begin at 11:30 and may be obtained by contacting John Usher, Ext. 2096, Bldg. 130. There will be a \$1 entry fee for BGA members and a \$2 entry fee for nonmembers. Deadline for signing up for the tournament is Monday, September 9. Those interested in playing, but who are unable to find a partner should contact Usher.

Softball

Games of August 19 League I

Model Ts on Tour

Last week Friday, a dozen Model T Fords putt-putted down Brookhaven Avenue on their way to the Exhibit Center. Earlier in the day, they had been parked near the tennis courts, drawing a crowd of lunchtime visitors. Not since Camp Upton days has the site seen so many Model Ts, which was Ford's first mass-produced car.

The antique cars belong to members of a Connecticut Model T Ford Club, who were on a tour of Long Island. Dressed in period costume, the club members attracted nearly as much attention as their cars as they got their lunch in the cafeteria, went off to Berkner Hall to watch the Lab's slide show, Quest, and then leisurely caravanned up to the Exhibit Center for a

visit. One BNL antique car aficionado commented that Model Ts can get up to about 40 mph, but they tend to rock and roll at that speed because of the front spring.

The Model T Club tour was arranged by the Public Relations Tour Program, which throughout the year handles special interest groups such as this one, as well as groups from schools, professional societies and other organizations.

The Tour Program also handles summer tours, which just ended last Sunday. All told, with equal numbers from the summer and weekday tours, Brookhaven has been visited by over 16,000 people in the past year.

Cafeteria Menu

Week Ending September 6

Monday, September 2
Snack Bar Service 9:00 a.m. - 2:00 p.m.

Tuesday, September 3
Cream of chicken soup (cup) .65 (bowl) .85

Roast turkey w/stuffing & cranberry sauce 2.30

Veal scallopini & 1 veg. 2.30

Hot Deli: Knockwurst & sauerkraut (bread) 2.15 (roll) 2.35

Wednesday, September 4
French onion soup (cup) .65 (bowl) .85

Baked meatloaf & 1 veg. 2.25

Roast pork loin w/apples & prunes & 1 veg. 2.30

Hot Deli: Chili dogs 2.25

Thursday, September 5
Lentil soup (cup) .65 (bowl) .85

Chicken Cordon Bleu & 1 veg. 2.35

Broiled flank steak & 1 veg. 2.40

Hot Deli: Pastrami (bread) 2.15 (roll) 2.35

Friday, September 6
Manhattan clam chowder (cup) .65 (bowl) .85

Old fashioned beef stew w/baking powder biscuit 2.35

Tuna noodle casserole & 1 veg. 2.25

Hot Deli: BBQ fresh ham (bread) 2.15 (roll) 2.35

Food Service

At the cafeteria, the snack bar will be open from 9 a.m. to 2 p.m. daily on Saturday, Sunday and Monday, August 31, September 1 and 2.

The Tap Room at the Brookhaven Center Club will be closed on Saturday and Sunday, reopening at 5 p.m. on Monday, September 2.

The vended food service in Building 912 will be in operation throughout the Labor Day weekend.

Hospitality News

The Hospitality Committee's next morning get-together will be Tuesday, September 3. We will meet at the Brookhaven Center at 9 a.m. for coffee, tea and danish. At 9:45, we will leave the Center and go to Berkner Hall to see a movie about the new Danish House, which is located in the apartment area. After the movie, we will go on a tour of the house.

Wives of Laboratory employees and guests are welcome. Please come and bring the children. Babysitting will be provided free of charge.

Arrivals & Departures

Arrivals

None

Departures

This list includes all employees who have terminated from the Laboratory, including retirees:
Rabindranath Bandy DNE
Roland A. Brocke Physics
Sheree L. Flippen DNE
Ioannis A. Papazoglou DNE
Deborah M. Rodhouse DAS

R/C Model Club

The regular meeting of the R/C model airplane club will be held on Tuesday, September 3, at noon, at the club field. All interested are invited to attend.

Placement Notices

The Laboratory's placement policy is to select the best-qualified candidate for an available position, with consideration given to candidates in the following order of priority: (1) present employees within the department, with preference to those within the immediate work group; (2) present employees within the Laboratory as a whole; and (3) outside applicants. In keeping with the Affirmative Action plan, selection decisions are made without regard to age, race, color, religion, national origin, sex, handicap or veteran status.

Each week, the Personnel Office lists new personnel placement requisitions. The purpose of these listings is, first, to provide open placement information on all non-scientific staff positions; second, to give employees an opportunity to request consideration for themselves through Personnel; and, finally, for general recruiting purposes. Because of the priority preference policy stated above, each listing does not necessarily represent an opportunity for all candidates. As a guide to readers, the listings are grouped according to the anticipated area of recruitment.

Except when operational needs require otherwise, positions will remain open for one week following publication date.

For further information regarding a placement listing, contact the Employment Manager, Ext. 2882.

LABORATORY RECRUITMENT - Opportunities for Laboratory employees only.

2312. **FIREFIGHTER/EMT** - Previous substantial firefighter experience is required. Completion of New York State EMT course and possession of training certificate is highly desirable, if not, completion of course within one year is required. Must be willing to work shifts at the completion of a thirteen week training period. Safeguards and Emergency Services Division.

OPEN RECRUITMENT - Opportunities for Laboratory employees and outside applicants.

2313. **INDUSTRIAL HYGIENIST** - Requires an MS or equivalent in industrial hygiene, toxicology, environmental health, occupational epidemiology, or a related field plus several years of relevant experience. ABIH certification and computer application skills are desirable. Safety and Environmental Protection Division.

2314. **TECHNICAL POSITION** - Requires an AAS degree or equivalent experience in electronic technology or related science fields. Familiarity with reactor safety, control and process instrumentation, and previous reactor experience desirable. "Q" clearance required. Reactor Division.

Autos & Auto Supplies

EARLY BUICK - or Jeep V-6 parts, blocks, heads, pistons, etc.; (2) 350 Chevy blocks, \$50 ea.; Manley pistons, 043 rings, \$150. alum. super rods, \$100. Bill S., Ext. 4434 or 399-6168.

81 **AMC EAGLE** - p/s, p/b, a/c, 6 cyl., stereo, new clutch, 4 wd, clean in/out, runs great, \$5,000 firm. Rose, 744-5069.

76 **FORD PINTO** - good running cond., clean in/out, \$500. 567-8618 after 6 p.m.

79 **RABBIT** - 2 dr., 5 spd., excel. cond., new brakes, struts, \$1,895. 751-1347 after 5 p.m.

76 **HONDA 750** - good cond., reasonable. 363-7032.

74 **FORD MAVERICK** - many new parts, best offer. 732-6871.

74 **FORD SQUIRE WAGON** - a/t, p/s, p/b, a/c, am/fm cassette, rebuilt eng./trans., new elec. ign., comp. tuneup, snows/wheels, \$1,200. John, Ext. 2050 or 588-6853 after 6 p.m.

71 **VW BUG** - 4 spd., runs but needs work, best offer. Ext. 3670 or 744-1760 eves.

73 **VOLVO 1800ES** - am/fm, cb, radar, a/c, 4 spd. w/overdrive, new cam, clutch, tires, exhaust, \$2,700. Jim Boomer, Ext. 4669.

73 **BUICK ELECTRA 225** - runs excel., many new parts, \$300. 981-5993 after 6 p.m.

80 **VW RABBIT** - 4 dr., 4 spd., diesel, 80k mi., excel. cond. Scott, 661-3777 or 281-1862 after 5 p.m.

80 **FORD SUPER WAGON** - V-8, 15 pass., a/c, am/fm cassette, cb, dual fuel tanks, cruise cont., a/t, encl. roof carrier w/lock, excel., best offer. 286-2020 after 8 p.m.

81 **PONTIAC PHOENIX** - 4 dr., hatchback, excel. cond., 4 cyl., a/t, a/c, p/b, p/s, new tires, \$3,500. Ext. 3504 Tues. and Thurs. or 878-1013.

RIMS - 6.00-13, 8.25-14; 5.50-16. Dolores Janes, Ext. 2950.

73 **OLDS 88** - good trans. & eng., needs body work, good for parts, \$75. 72 VW 411, station wagon, a/c, good in/out, good for parts. Ext. 2705.

78 **PONTIAC WAGON** - \$2,800. Ext. 2058.

TIRES - (1) L78-15; (1) J78-15; (2) G78-14 snow, \$10 ea. Tony, Ext. 7772.

69 **CHEVY** - 9 pass. wagon, \$350; 1975 Suzuki 400 cc, \$450, several 14" tires, some w/rims. John, Ext. 4214 or 475-5543.

73 **PONTIAC** - good shape, runs great, \$650. 588-1464.

72 **TRAILER** - 19', sleeps 6, Tandem wheels, \$2,100 neg. 588-1464.

74 **CHEVY WAGON** - V8, p/s, p/b, a/t, clean, excel. cond., \$900. Lengeler, Ext. 3525 or 5611.

78 **OLDS 88** - 4 dr., a/t, a/c, p/s, p/b, new tires, battery, excel. cond., \$2,800. Ext. 4169 or 981-5696

80 **RENAULT LE CAR** - very good cond., 47k mi., \$1,600. Jerry, Ext. 5506 or 732-4701.

82 **PLYMOUTH RELIANT** - 4 cyl., 4 spd., 4 dr., excel. cond., \$3,895. Ext. 2674 or 325-1322 after 5 p.m.

77 **CAMARO LT** - 3 spd., p/s, spoiler, cassette, runs well, looks good, \$2,800 neg. Steve, Ext. 5163 or 475-6964.

73 **MERCURY COUGAR XR7** - p/s, p/b, a/c, a/t, p/w, am/fm stereo cass. w/equalizer, new custom wheels & tires, excel. body & int., \$2,100. Barry, Ext. 5624.

75 **OLDS OMEGA** - p/b, p/s, a/c, am/fm, good cond., snows with wheels. Harvey, Ext. 4550 or 286-8639.

79 **PONTIAC SUNBIRD** - a/t, a/c, stereo, 57.5k mi., clean, \$2,350. Ext. 4175 or 298-4089.

71 **FORD LTD** - excel. running cond., p/s, p/b, am/fm radio, vinyl roof, \$650. Don, 281-7595.

TRAILER - 28' Coachman Bunkhouse, sleeps 9, like new, self-contained, must see, \$6,000. 732-5445.
